THE KRYON TEACHINGS

Channeled by Mario Liani

The Kryon Group is the name that Mario Liani uses to describe the loving energy of Kryon.

This energy is not a single entity, but a higher consciousness group of angelic realms that operates without individuality and with absolute synchronicity.

Kryon is channeled in several languages by different spokespersons around the world.

Mario Liani is a channel for Kryon in the Spanish language.

CELEBRATING THE 11:11

Channeled during 11-11-2004

Beloved Human:

This time, I speak to you directly. These words you now read or hear are for you, the beloved Entity, child of Spirit. These words are channeled through one of the many channels that the Kryon Group enables whenever is necessary, at the proper time.

When I tell you that I am Kryon, to honor the truth, I am not saying that "I Am"...This is just a way of telling you that I "exist," though you cannot be certain of that just because I affirm it through one of the emissaries who lends his intent for this purpose.

I am Kryon and I represent a Group of Entities who are beyond your comprehension and who work together as "one." All the entities that form and conform to this unique energy have agreed to fuse in one single projection, without individuality, so that you can assimilate the lessons that I wish to bring to you, just as I have done throughout all these years, thanks to the impeccable work done by all the channels who communicate my teachings.

Beloved human, do not prejudged our channel, by judging him you would only be judging yourself, since you could also channel this energy of love that is available to anyone who desires it. If you close your eyes and focus for a moment on yourself, I assure you that you will be able to feel how your thoughts change frequency, the frequency of communication with Spirit, which is available to all who want it.

Do you know what the difference is between one who channels Kryon and someone else? There is no difference, except your belief system and personal mission. The language Kryon uses through each different channel depends on these factors, but in the end, you will find that the loving essence of the Kryon Group is there, present, not unlike a brand, or a signature, or a style.

Many of you have asked yourselves how you can recognize or know if a Kryon channel is genuine or authentic. The answer is not in the words that the channel uses, nor in his reasoning or the subject, or whether or not his work is widely known... the answer is not in what you perceive externally, nor in what you can see,

touch or smell. The answer is in what each of you feel in your heart. The authenticity of the Kryon message can be verified inside the one who receives the message, the Kryon signature resonates and vibrates within you anytime you know without a doubt that I have moved you or that I have made you cry with joy or relief... whenever I have vibrated and resonated within you.

Tune in now and listen. You do not need permission or special dispensations. You only have to activate the third language, the one that will allow you and I to connect permanently in the same frequency; without complicated protocols or elaborated rituals. You can talk to me in any language you want; you can do it with words or a group of images (we like this method); you can call on me any time, any place... Call on me as you would on a most intimate friend, or your loving companion... You choose how you want our relationship to be, I want you to feel comfortable. I am only here to be with you, I don't ask for anything other than for you to tell me what you need from me.

I have chosen to speak to you in this way today because we have a special reason. I have a special reason to celebrate today, and you know how celebrations are... anytime we have an important date that reminds us of something, we have a reason to celebrate, and we are all there wishing to pay homage to the moment; this is how we honor a memory or a moment, something that perhaps will never be born on that day or perhaps it has already been born and we are honoring its passage through life.

Today, we have a special reason to celebrate since the rhythmic sequences of your human calendar are showing the code 11:11. Today is the eleventh day of the eleventh month, and the calendar that measures your linear time brings us a new reminder of the activation of the 11:11.

Every year and every November 11, successively, the message of the 11:11, even though it remains in the back as a general message, evolves slightly to adapt to the rhythmic frequency and mathematics of the universal cycles that govern humanity's chronological time, the same humanity that has recognized and adopted for themselves this system to calculate time.

Right now, people all over the world are activating these galactic codes, individually or in groups and by different processes or rituals. This is the spirit of celebration: this is the spirit of remembering and honoring a special moment, acting with the sacred intent of activating it and renewing it. Today is the day to activate and renovate the 11:11 code.

The Kryon Group honors the sacred intention of these large numbers of Lightworkers who are focusing their energies to unify their intent and raise the planetary consciousness. You are the wax candles, the kerosene lamps or the potent reflectors in the lighthouses perched upon the cliffs... The intensity of each beacon of light is not what is important, what is important is to achieve a repetitive and cumulative effect.

The Kryon Group feels honored by these celebrations and activations taking place all over the planet. Each one has a purpose and no one is more important than the other, they are all geared towards the healing of a living entity called "Earth and its inhabitants."

However, beyond the group ceremonies and celebrations, the Kryon Group wishes that you, beloved human, receive this message of celebration and activation of the 11:11 in a very personal way, directly through my words and in the name of our dear Family, of which we are all a part of.

I know who you are, you and I are part of something great and hard to explain, particularly for your level of comprehension. However, I know who you are and what you think. And now, beloved human, you are thinking: "Kryon, I think this business of the 11:11 is very interesting and very deep, and even though I am not participating in any ritual to reactivate it, what are the consequences for me? What evolving parts are being activated today for the human race?"

Beloved human, let me tell you that we have a special interest in the entity channeling right now, that he would leave behind all the doubts and dualities humans experience when it comes to speaking about something that is difficult to prove or demonstrate. We chose this entity to speak about the numerology of the 11:11 because of his belief system and expertise in numerology, the ancient science of numbers.

You must know, if you have followed my teachings throughout the years, that the Kryon Group has a special preference for numerology. In fact, I have given you information through the interpretation of numerology in situations related to my teachings. In virtue of this, I have chosen the entity that now channels because of his knowledge, so that he can relay my message about the 11:11.

The Labyrinth of Time

The measurement of linear time obeys the handling of linear life just as you project it, where events appear to happen through a temporal sequence that establishes a "before" and a "after," a cyclical "tick – tack" that unravels through an increasing and successive numeric sequence, applied to the different levels or temporal structures (seconds, minutes, hours, days, weeks, months and years), which intercept each other with absolute precision.

Humanity has not rid itself of this system of calculation because it is not inadequate, as well as the calculation of time through the successive numbers that change month after month and year after year.

In the mechanics of linear time to which you are accustomed, inexorably, the numbers displace one another following a rhythm of their own, an increasing and successive rhythm that has its own laws. This rhythm governs the linear time and linear time makes it possible to explain, through mathematical law, why the synchronicity of the universe quietly awaits behind the corners in the labyrinth of time.

Linear time and inter-dimensional time coexist in the labyrinth of time. Linear time is like a spool of thread that has been unraveled by you; you will always have a thread at hand that will enable you to know exactly where you are in the labyrinth. If you did not have that thread you have unraveled along the pathways in the labyrinth, the journey could be intriguing and difficult.

Linear time connects with inter-dimensional time through numeric codes that not only feed what is to come, beloved human, but also contributes to activate the movement of everything that surrounds you, connecting people and events like links in a chain that open and close when they come in contact with each other.

Every time certain codes connect, they form or activate new codes, and the joining and intercepting of these codes form "live pathways" within the labyrinth of time. These pathways that you cannot see are inter-dimensional in nature, and they represent potentialities of All That Is, they are linear time codes and they form a sort of winding "time path" and it is hidden in the thread that runs throughout the labyrinth.

The linear time and the no-time or inter-dimensional time, are two faces of the same coin: if we have time, we also have no-time. Time exists because you perceive it linearly. Time exists because of your perception. To stop perceiving time is to suspend linear time and enter the inter-dimensional time, in other words, you can walk all the pathways of the labyrinth without having to follow the thread...

Every time you count a "tick –year–tack" that passes, we adapt to your calculation and introduce parallel energetic concepts. These concepts are structured like some sort of inter-dimensional road markers in the human highway. When we speak of neutral implants, harmonic convergence, new dispensations and new beginnings, we do it in order to introduce a strategy that will help you see the events taking place in your temporary frame in a such way that you only see the time markers (instead of the simple elements of the temporary tabulation), like milestones that mark the significant changes in humanity.

Every "tick-tack" of the passing time produces an energetic marker, and this marker translates the reading of numbers to a temporal-spatial interpretation. The "tick-tack" of your clock, beloved human, marks today the 11:11, the potential for a new world.

Celebrating the 11:11

Beloved Human, I begin by telling you that every year the 11:11 combination is repeated because you will always have in your calendar an 11th day with an 11th month. However, does it express the same potential year after year? Even though the spirit of the message of the 11:11 remains unchanged, undoubtedly, the answer is "No," since the digits that tabulate the passing of the annual cycles change every year, and the combination of all the potential digits (day, month, year) is what provides the different interpretations, which is nothing else other than a variation of the rhythmic frequency of the passing of linear time as you know it.

There are aspects to the 11:11 combination that are static, and there are others that are cyclical. If you notice, in the numbers that you call "Julian," named after the Julian calendar, in which the days including January 1st and after, are days that can be counted successively, you will see that November 11 of every year is always the 315th day of the year, except on leap years when the 11:11 falls on the 316th day.

If you add 315 and reduce this number to a single digit ($3 + 1 + 5$) you will come up with the digit 9. If you do the same simple numerological operation with the number 316, you will get 10.

What I have just demonstrated is simple numerology; it shows that every year that is not a leap year the 11:11 carries a strong, implicit potential for endings and conclusions, outcomes, changes and transformation, it's ideal for reevaluating your life, for personal balancing, for rectifying errors or mistakes, for putting things in order, for healings and closures, eliminating the superfluous, leaving behind for good anything you don't want in order to make room for the new aspects that will lead you to new chapters of your life.

Beloved Human, notice the meaningful potential that gathers every year that is not a leap year in the symbolism of the 11:11, and of those three digits that also speak for themselves. Notice the order: 3 – 1 – 5. The potential for outcome begins with the number 3, which symbolizes the innocent optimism of a child who approaches everything with spontaneity. The number 1 characterizes the need to make a decision in order to take a different path. The number 5 speaks of new things to be found in the path of the road explorer.

Do you want me to translate it? The 11:11 carries a powerful potential for transformation, which you should approach through these three aspects: optimism, initiative and willingness to change.

However, every four years there is a change in this cyclical energy of the 11:11. During leap years, the Julian numbers add to 10, this compound number most definitely symbolizes the road to personal renewal through the restructuring of patterns and powerful changes in your personal life style; here, the interpretation is "renewal through a new beginning." The order here is 3 – 1 – 6 and this last digit (we have already explained the first two, haven't we?) is the symbol of Family, of the Human Family. Meaning, your family, your family's family, the family you call society, the family called Humanity and us, your Spiritual Family.

During the leap year, every four years, the energy of the 11:11 changes and it's characterized by the need for humanity to undertake a renovation of the rules, mainly on a social level or to put it differently, on a global scale. First, three years of cleansing and healing, characterized by the number 9 followed by a year of renewal on a global scale.

Beloved Human, can you see what I see? Can you see the complete picture of the numeric sequence that is there for you to perceive and interpret? Do you understand now what I was trying to tell you when I spoke of the "almost static" potential of the 11:11?

Let's say that these are just words to explain that every four years a circle or cycle of preparation of the energies of change is completed, to which Earth and its inhabitants are subjected. The circle seems static because, even though it is there, surrounding you in the inter-dimensional time, you cannot perceive it, you do not perceive it as the circle that it is but as a straight line that has no end.

Your perception is logical, since you don't have enough perspective or the adequate distance to elevate yourself above your situation and observe it from a panoramic viewpoint. The view of this circle of every four years is only one of the panoramic perspectives that we can show you, so that you can perceive that is "almost static" since it has a limited and repetitive rhythm.

Even though I was able to show you an "almost static" perspective of the energies of change that characterizes the 11:11 code, which is connected to your time measuring system, I can also show you a more changing and precise perspective, it has to do with the passing of linear time, measured year by year, by the counting of the passing years.

Every 11:11 marks an annual cycle, the annual cycle of the 11:11; depending on the year that this mark or measurement occurs. Numerologically speaking, you, because you are human and live in duality, cannot escape a cyclical measurement that takes into account numerical aspects related to the passing of time, since this is your frame of perception, this is your reality, the one you came to experience and transcend.

Even though we have repeatedly given you, throughout the years, different guidelines to transcend that linear viewpoint, it's obvious that a part of you has to live with this reality and the belief system related to it (which is your belief system), if it weren't, you would not be here. Therefore, consider this information we are giving you now, very practical information that complements information given on other occasions. As I told you before, each channel relies on his/her belief system to adjust the information we want to transmit and we, who know very well the belief system of each channel, utilize these "limitations" (which are really not

limitations) to be able to transmit knowledge at the appropriate level for each circumstance.

This year, the 11:11 interacted with the energy of 2004. In numerological terms, in order to find out the potential born on November 11, you should add all the digits in the date as follows:

$$11 + 11 + 2 + 4 = 28 \text{ (reduce 28 to a single digit of } 1, 2 + 8 = 10 = 1).$$

Beloved Human, you must notice that that I didn't add in this way:

$$1 + 1 + 1 + 1 + 2 + 4 = 10 = 1$$

And do you know why? Because the number 11 has a potential too powerful not to be acknowledge, or to be ignored (and therefore simplified). So, whenever you see a number 11, you are seeing a number 11 and not the sum of 1 plus 1.

To continue with our numerological analysis, we now have the compound number 28 which is reduced to 1. In the beginning, this result was very meaningful since the reduced digit 1 coincided with the potential 10/1 of the Julian number on a leap year, which demonstrates with certainty that the 11:11 of this year is fully characterized by the need to take a different path.

I want you to know that we have not seen this "coincidence" recently. We will show you why this "coincidence" is of numerological importance:

LEAP YEAR	POTENTIAL
11-11-2004	28/1
11-11-2000	24/6
11-11-1996	47/2
11-11-1992	43/7
11-11-1988	48/3
11-11-1984	44/8
11-11-1980	40/4
11-11-1976	45/9
11-11-1972	41/5
11-11-1968	46/1

Beloved human, observe the "coincidence" of the 1 in a leap year that happened 36 years ago in 1968. I want you to notice that the cyclical circle of 4 years is encoded in a greater cycle of 36 earthly years. This means that in 1968 humanity took a very important step towards change.

Do you remember all the important social movements of 1968? Humanity was leaving behind an era of war between the powerful country of the north and an Asian country; we saw the birth of peace movements that advocated "love and peace," and the insurgence of important student movements in Europe in May of 1968; sexual freedom was advocated, and movements related to feminism and ecology, and the list goes on...

The potential of the 11:11 of this year is revealing, and the revelation lies in the interpretation of the number 28 that reduces to the single digit 1. The potential for learning this compound number involves numbers 2 and 8. Number 2 is the number that characterizes the feminine and everything that the word implies, mainly the emotional aspects such as sensitivity, courtesy, friendship, gentleness, understanding and cooperation, while the number 8 presents strong masculine aspects that characterizes the struggle for power and the control of material things.

The number 8 in its positive aspect expresses a learning related to the proper, just and balanced handling of political, military and economic powers; in short, the power itself, just as you perceive it or associate with the state of things.

As you can see, beloved human, both aspects are in apparent opposition, since the number 2 represents submission while the number 8 represents control. Combined, both aspects have to do with the fear of giving in and losing control of situations.

Therefore, humanity's challenge during this cycle of 11-11 is to achieve and manage a balance in the combined attitudes of competition and sensitivity, and to balance the feminine with the masculine side of power, in order to achieve flexibility and tolerance in all levels.

Beloved human, would you like me to demonstrate what I am explaining? This example should be enough, I am sure. Did you notice that two of the important religions of humanity were anxiously waiting for the outcome that would be announced precisely on the 11-11? Did you notice that right away the search for balance and understanding prevailed during the final hours of the entity that parted? *Translator's note: Kryon is referring to Yasser Arafat, head of the Palestinian Liberation Organization.*

And lastly, did you notice how the differences between the two religions were put aside for a while, to honor that important moment? What do you think about the symbolism of this moment, seen within the context of the 11:11, and what would it mean to humanity if these two tribes came to an understanding? Do you remember everything we told you about the change our future generations will see when these new generations take over the political dialogue? Do you understand now that the leader that parted left room for new leadership that will break the 30 year-old mold, maybe 36?

The 11:11 this year has the imprinted code of the beginning of a new path for humanity, and the potential to activate in each person the decision to take a new path; a path that involves powerful personal changes of all sorts, changes that will take humanity beyond itself.

The 11:11 marks the need for change at a personal level. These tendencies suggest the need to discern between the external impulses and the impulses of the heart, so that you can finally understand that when you compete and confront another human being, you really are doing it against yourself, as if you were your own enemy.

Beloved human, through this channel the Kryon Group has given you a new view of the 11:11 paradigm; a view focused primarily on numerology, but accompanied with the circular view of the inter-dimensional time we have been transmitting during all these years. The circle of 4 years within the 36-year circle is only a brief look at inter-dimensionality, adjusted to your human vision.

We wanted to adjust this interpretation to a mathematical and numerological sequential view, so that you can perceive the order behind the unimaginable, since what appears to be unimaginable is, in the end, a product of Spirit-Humanity co-creation, in line with the Divine Order beyond human comprehension.

The Kryon Group highly values numerological information, because numerology is a sort of codified mathematics that contains information that goes beyond mere quantification, allowing us to condense information in solid energetic packages that can be interpreted on a personal and universal level.

The numbers are a manifestation of the Divine Order and the Kryon Group wants to honor the energy of divine manifestation behind the mathematical symbols you deal with every day, without even knowing that those symbols are signals from living entities who collaborate to draw the current map of your evolution.

Beloved human, you probably think that it is time to say goodbye, but I have decided that I am not going to do it today. In inter-dimensional time there are no goodbyes, as we are always with you, even when you don't notice it.

So the Kryon Group is still here...

Kryon
